

Meet Our Artisans

Orchardist/ Photographer *Cathy Cooks*

Cathy and her husband Barry have been working with the University of Saskatoon for many years to develop new varieties of fruit trees that are hardy to the prairies. Their orchard is fully organic, a real wonder to see and is operated as a u-pick. Cathy will freeze the fruit that is not used in the u-pick and sell year round, or until it is gone. The 2 of them are also amazing nature photographers, and many of the bird photos on our site have come from them.

A *creative* life requires an inspired setting. Build your life and your life's work in Empress. Empress is a quaint village of artisans, makers and prairie people. It's a place to find the time, space and peace you need to conjure creativity, produce art and build community.
